This stunner needs a new owner! This home has more flex space than you'll know what to do with! The master bedroom is downstairs, away from the other bedrooms for extra privacy, and includes a huge walk-in closet and a master bathroom that has plenty of space and a garden tub! Upstairs, there are 2 more bedrooms along with a loft next to the FROG, with serves as a fourth bedroom! Downstairs you have a great family room with hardwood floors and woodburning fireplace. The kitchen has enough room for a table and chairs to complete the bistro effect in the eat-in kitchen. Outside you'll find a huge deck, perfect for entertaining and grilling. Storage unit outside adds a little extra storage space and the perfect amount of yard for very little maintenance.

Don't miss this one!
