Simply breathtaking!

My reaction when entering this beautiful home in gated Headquarters Island! Located overlooking the Intracoastal Waterway and Stono River with nearly a half acre, this home accentuates the expansive views of the waterway and the natural surroundings. With nearly 6000 square feet, 5 ensuite bedrooms and two media/game rooms, there is plenty of space for entertaining, family and friends. Built in 2007, this stunning home was completely renovated in 2015/16. The new decor could be described as Island Elegant and includes new Shiplap walls in many areas, new lighting fixtures, new cabinetry and plumbing fixtures in kitchen and baths, and an updated light and cool color scheme. Subtle perfection and just 7 miles to downtown!
