The kitchen is open to the living room with a fireplace with an elegant custom mantle with granite surround and hearth and new gas logs. The master bedroom has a sitting area, while the master bath renovation includes a huge tile shower, a new linen closet and the double sink vanity features granite and crystal knobs. The other two bedrooms share a hall bath with a granite countertop. The FROG is huge and is currently used as a media room and office, although it can be a 4th bedroom, as it has a closet. The patio has columns with custom copper lanterns and there is a brick wall bench built around the fire pit. The landscaping has been redone in the front and back and has and is illuminated by LED landscape lighting.
