29.9 Acres

Seller is willing to walk the land with your buyer. He has cameras in place, deer stands and has cut roads/paths within the property. The acreage is maintained for easy driving and walking. Seller hunts deer, hog and turkey on the property. Seller built a walking bridge over a running stream with a camera in place to show wild life that walk across the bridge.

Call listing agent for details on how to access the property.

Seller has to be notified because he currently hunts the land so I have to let him know when someone will want to view for safety.
